

I believe eliminating listener supported, christian radio stations such as KLOVE as a result of LPFM station priority will cause a further deterioration in our society. These are the only radio stations that myself and my family can listen to without being concerned about inappropriate language or content. I support freedom of speech, and a persons right to comment as they feel inclined. However, there needs to be a "safe house" where I can turn (especially one I support with my own dollars) where I can trust the content to be family oriented.

Consider what we want to eliminate carefully before we do so.

Thank you.
